

POTENTIAL MARKETS

Circular Economy solution for a local, sustainable and safety food chain in both sectors:

HORECA SECTOR

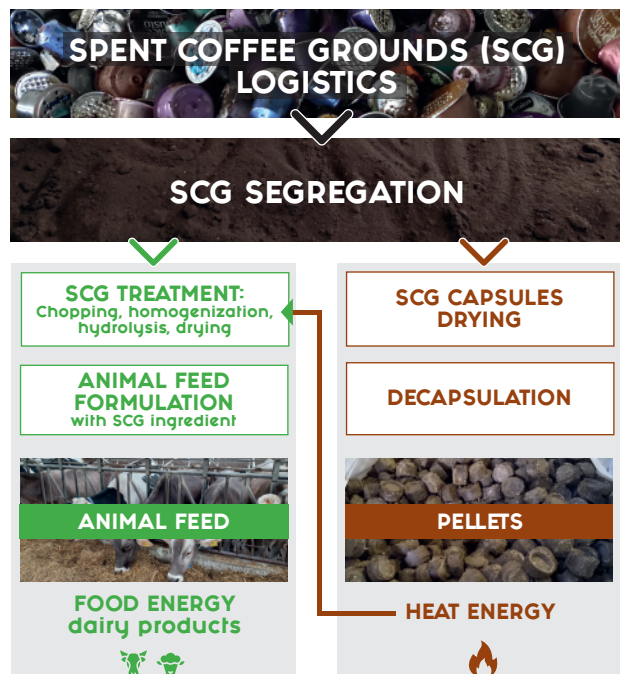

Improved solution to increase the value of coffee by-products by enhancing logistics management.

FEED SECTOR

High nutritional value ingredients able to meet the high demand for new raw materials, a very competitive solution in a growing feed market.

PROCESS

We offer an innovative, sustainable and safe technological solution, replicable to any European scenario, and the capacity to develop a turnkey production plan

from coffee by-products to animal feed

An integrated solution based on circular economy for the collection and transformation of coffee by-products into an ingredient for sustainable animal feed.

CIRCULAR ECONOMY SOLUTION

This comprehensive solution encompasses the entire process from the generation of coffee grounds to animal feed:

- **The logistics** necessary to maintain safety the properties of the by-product.
- **The stabilisation processes** that combine highly efficient technologies to ensure the quality and safety of the nutritional properties of the resulting ingredient for animal feed formulation.

FEATURES

1

INNOVATIVE AND SAFE

- Demonstrated process on at semi-industrial scale.
- Suitable ingredients for animal feeding.
- Validated products in their final applications.

2

FLEXIBLE

- Replicable to any European region.
- Adaptable to different scenarios.

3

SUSTAINABLE

- Circular economy based solution.
- Eco-designed process and production plant.

4

HIGH EFFICIENCY

- Optimized energy consumption.
- Adaptable to any renewable energy source.

5

CONSORTIUM CAPACITIES

- Customized solution.
- In-house technology.
- Detailed engineering.
- Turnkey solution.
